

40 x 48 Freezer Spacer

Uncommon strength and durability. Ideal for tempering, cooling and blast freezing food products, the ORBIS Freezer Spacer has proven itself suitable for a wide range of low-temperature applications. These spacers will not splinter or degrade even at temperatures of -60° F. The spacers incorporate an open-lattice design to maximize airflow through the stack to accelerate the cooling process and provide more even cooling in large-volume applications. The spacers are lightweight and nestable for easier storage and handling.

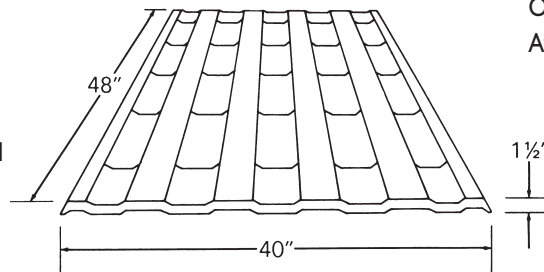

Industry Applications:

- Dairy
- Food processing
- Meat and poultry
- Seafood

Model	Dimensions			Weight (lb.)	Truckload Quantity	
	L	W	H		48' Trailer	53' Trailer
40 x 48 FRS	40.0	48.0	1.5	16.0	1,512	1,620

- Environmentally friendly and 100% recyclable
- Smooth, all plastic construction protects product (no nails, rust or splinters)
- Reduces packaging waste by eliminating corrugated packaging disposal
- Improves workplace safety with smooth design and stable stackability
- Rapid economic payback

Design:

High-density polyethylene, structurally molded
Open lattice flow-thru design
Available in FDA-approved materials
