

Aluminum LP/Oxygen Gas Cylinder Storage

Interior racking system for horizontal cylinder storage

★ Model #LP4
33"H x 30"W x 32"D

Non-sparking Aluminum Gas Cylinder Cabinets provide significant advantages over conventional painted steel models. Designed for outdoor storage using .125" thick aluminum construction, these heavy gauge cabinets will resist weathering and won't corrode or discolor. All-welded 12-gauge aluminum construction features expanded metal sides and doors. Welded padlock hasp is standard for controlled access. Just $\frac{1}{3}$ the weight of painted steel units, SECURALL® aluminum models offer real savings on shipping charges. Models ship fully assembled and ready to use. Labels ship unattached to storage unit for individual placement depending on product application (*as shown at the left*).
